

AptiQuest - Official Rulebook

AptiQuest is an aptitude-based competition testing quantitative, logical, and analytical skills. The event will be hosted on the Matiks App, with mandatory physical participation at the New Lecture Hall Complex (NLHC) on campus.

1. General Guidelines & Venue Rules

- **Platform & Venue:** The test is entirely on the Matiks App. However, all participants must report physically to the designated NLHC. Remote participation is strictly forbidden and will result in disqualification.
- **Device & Network Requirements:** Participants must bring their own fully charged smartphones with the Matiks App pre-installed. You are responsible for your own mobile data connection as a primary or secondary network; dropped connections due to NLHC Wi-Fi overload will not be grounds for a re-test.
- **Account Integrity:** Only one device login is permitted per participant. Multiple concurrent logins will trigger an automatic ban.

2. Event Structure

- **Round 1 (Preliminary Aptitude):** An objective test covering Mathematics, Quantitative Aptitude, Logical Reasoning, and Mental Ability. Emphasis is on speed and accuracy.
- **Round 2 (Advanced Aptitude):** Shortlisted participants will receive a new test module on the Matiks App featuring high-complexity problems.
- **Final Round (The Ultimate Challenge):** The top percentile will compete in a H2H on select modes for the championship.

3. Anti-Cheat & Physical Proctoring

- **Digital Monitoring:** The Matiks App environment tracks background activity. Minimizing the app, switching tabs, or using split-screen features will result in immediate auto-submission.
- **Physical Enforcement:** The NLHC will be actively proctored by the organizing committee. Any talking, looking at other screens, or using secondary devices (laptops/smartwatches) will result in immediate physical ejection from the hall and digital disqualification.
- The organizing committee reserves the right to cross-reference physical proctor reports with Matiks App analytical logs (e.g., suspicious completion times or unnatural accuracy spikes) to issue bans.
